

media connect

bandwidth changes everything

bandwidth changes everything

We are a bandwidth infrastructure provider, delivering market leading fibre-based network solutions to our media customers across Europe.

13

metro cities with unique duct and fibre ownership

260+

connected data centres
- Europe's leading data centre connectivity provider

12

cloud platforms directly connected to our networks

50+

connected post production houses

5

connected media hubs

5

connected broadcast/
layout centres

media connect

We package our connectivity and cloud access capabilities for the **media community**, delivering media connect. We've invested in connections to key media areas around the UK and Europe, from **Chiswick Park to Wood Lane & Soho**, to **Here East** as well as **Media City in Manchester** and **Hilversum** in the Netherlands.

Learn more about:

- our capability as a bandwidth partner within the **media community** – to studio, post production, delivery and broadcast
- rapid service delivery
- flexible project based contract options
- diverse cloud access options

connectivity

We look at ways to enable the media community with high speed bandwidth connections and dark fibre based solutions.

- pre-deployed connectivity enabling rapid service turn up across our footprint with service level agreements
- reliable, private and dedicated connectivity with options between key media hubs
- compelling economics, with scalable connectivity packages ranging from 1Gb Ethernet to dedicated Fibre and 10 to 100Gb Wavelength solutions.
- direct connection to over 260 data centres
- direct connection to 12 cloud platforms, including AWS and Microsoft Azure
- flexible commercial terms- contracts available on a project or proof of concept basis

cloud connect

Enabling innovative and cost effective workflow delivery with connectivity to the cloud.

euNetworks is the leading cloud connectivity provider in Europe, with direct connection to 12 different cloud platforms. As an AWS direct connect technology partner and Microsoft Azure partner, we offer industry leading cloud access.

We're working with media customers today to develop their cloud environments.

- comprehensive SLAs covering packet delivery and availability, from 99.8% to 99.99%
- connectivity through a private network or hybrid environment in preference to using the Internet
- committed latency and jitter numbers for predictable connectivity to the cloud
- connection speeds from 10Mbps to 10Gbps, with granular access methods suited for large enterprises to small branch offices

who and where

We work across all aspects of the **media workflow**, supporting clients from **visual effects** and **post production**, to **broadcast**, **playout**, **advertising** as well as with **studios**.

Our city based networks connect into key sites. We continue to invest in our network footprint, adding fibre miles and new sites in line with our customer needs as well as working with our media partners on new technology and solutions.

our network

At the core of our service is our network. We own and operate high capacity fibre networks in many of Europe's key business centres as well as a truly diverse backbone network.

The Stockroom & DataRoom Archive Management London

“We’ve worked hard to develop our reputation as a leading digital asset manager and delivery business in the media industry, with our ability to rapidly scale ChilliVault, our file management platform, being vital to this. The fibre based network that euNetworks delivered to us in 2014 is an important piece of infrastructure enabling us to focus on what we do best.”
